

Ex.no:7B	DATA VISUALIZATION USING TABLEAU (LIFE EXPECTANCY DATASET)

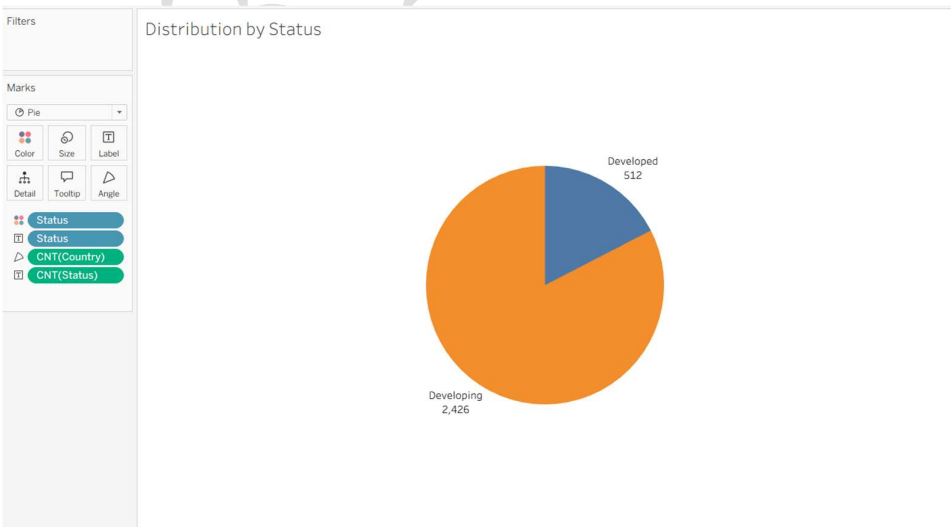

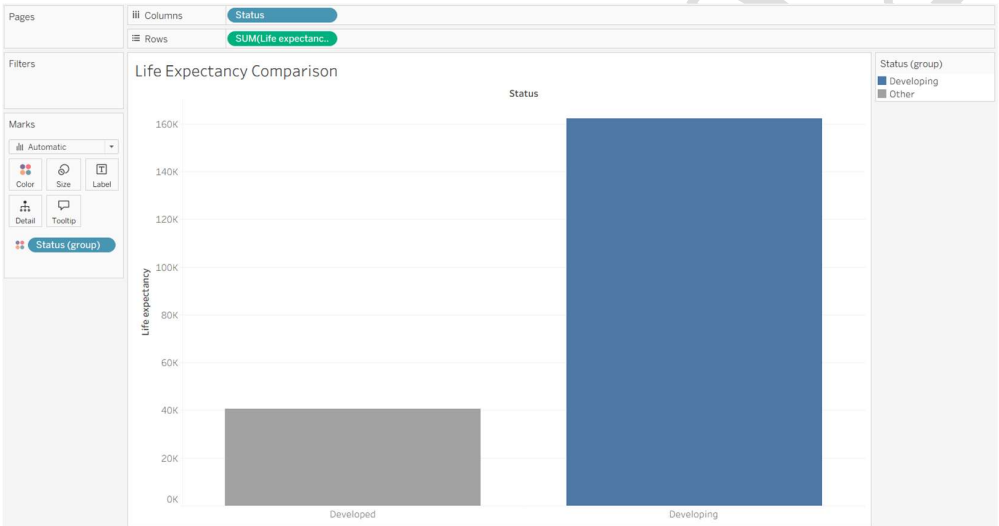

Aim:

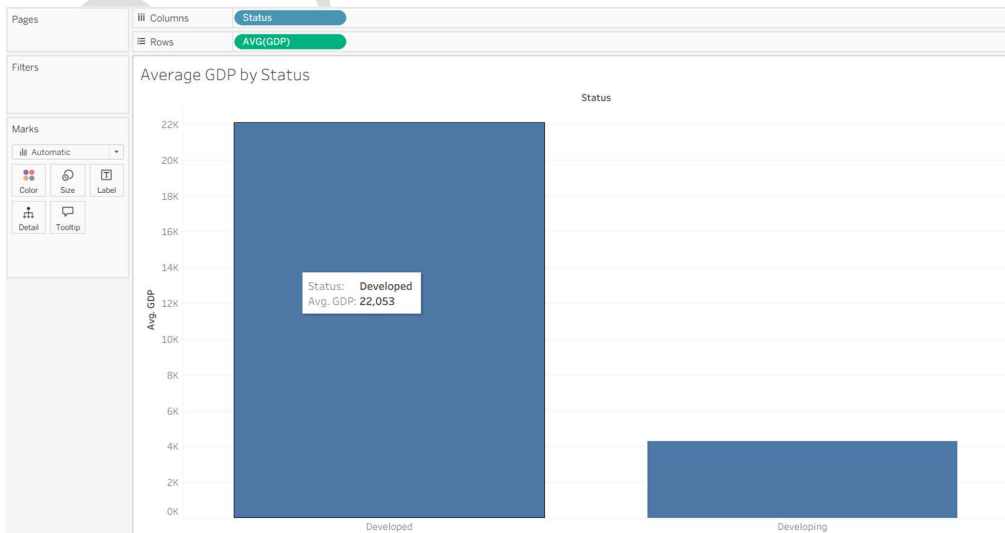

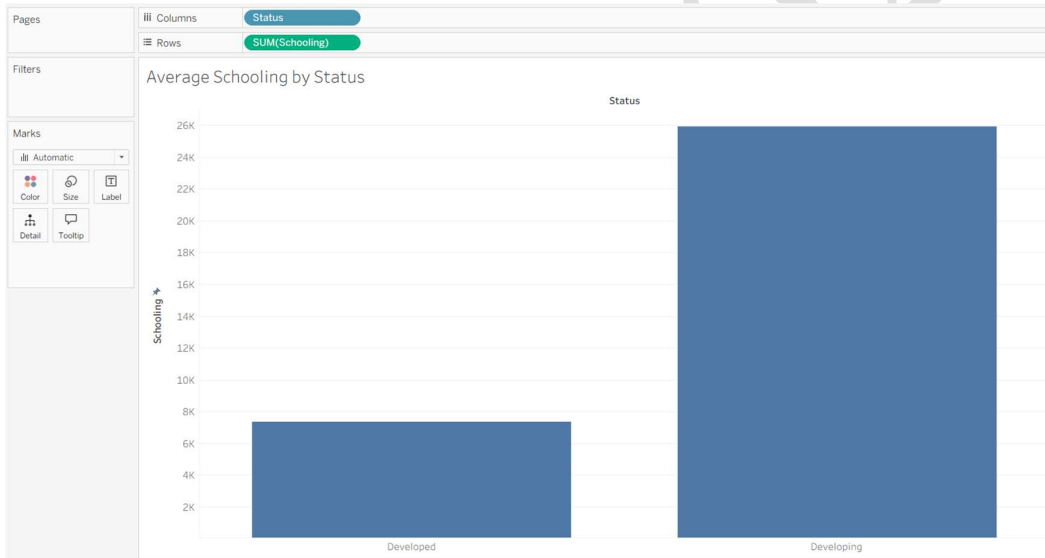

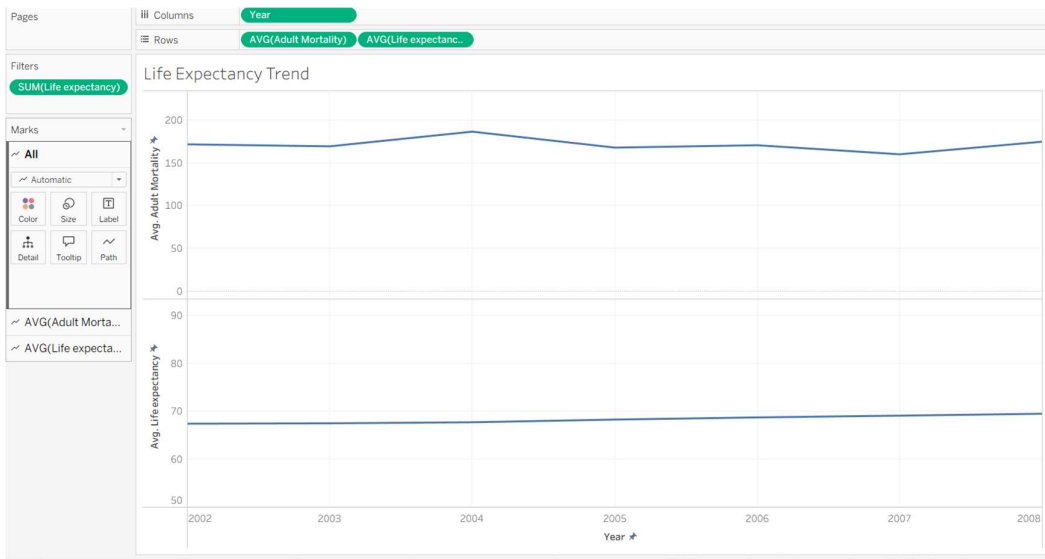

To perform data analysis, data preparation, and visual exploration on the Life Expectancy dataset (Life Expectancy Data.csv) in Tableau Desktop to analyze life expectancy patterns, health indicators, economic factors, and country development status for meaningful insights.

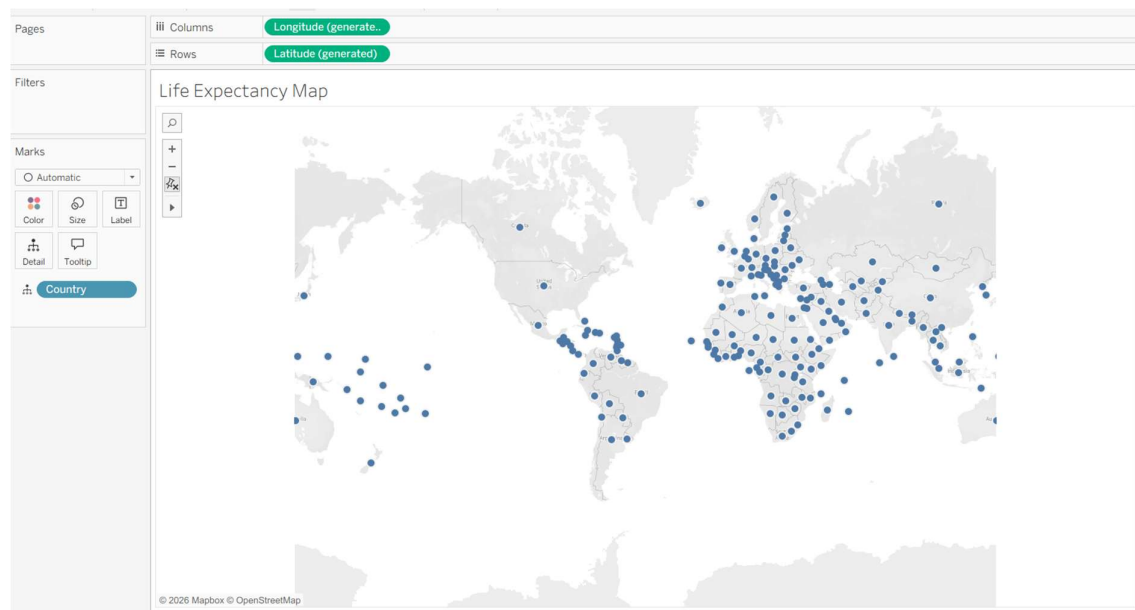

Algorithm:

1. Data Ingestion & Connection
2. Connect Tableau Desktop to Life Expectancy Data.csv as a text file source
3. Verify field data types such as Country, Year, Status, Life expectancy, GDP, Population, Adult Mortality, and Schooling.
4. Data Cleansing & Transformation
5. Handle missing or null values across important fields such as Life expectancy, GDP, Population, and Schooling.
6. Verify numerical and categorical field types for accurate analysis.
7. Exploratory Visual Analysis
8. Life Expectancy Analysis: Compare average life expectancy between Developed and Developing countries.
9. Health & Economic Analysis: Analyze relationships between Adult Mortality, GDP, Schooling, and Life expectancy.
10. Trend Analysis: Plot Life expectancy across years to identify changes and overall trends.
11. Dashboard Assembly & Formatting
12. Combine key worksheets into an interactive Life Expectancy Analysis dashboard.

Output:

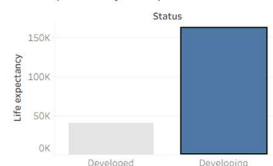

Life Expectancy by Status

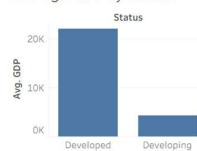

Life Expectancy Map

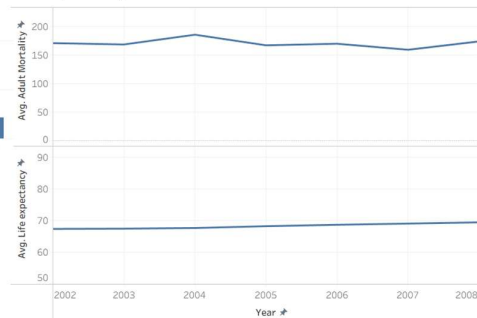

Life Expectancy Comparison

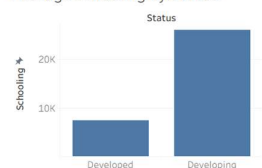

Average GDP by Status

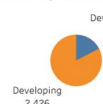

Life Expectancy Trend

Average Schooling by Status

Distribution by Status

Life Expectancy by Status Life Expectancy Comparison Distribution by Status Life Expectancy Trend Average Schooling by Status Average GDP by Status Life Expectancy Map Dashboard
